

# TRANSFORM YOURSELF

2-days Course in Supply Chain Management  
by Institute for Supply Management (ISM) India

## RISK MANAGEMENT IN SUPPLY CHAIN

Haffa House, Muscat, 12th and 13th October 2015

Instructor: Mr. Krishan K. Batra, President & CEO of ISM – India

## COURSE OVERVIEW, OBJECTIVES & METHODOLOGY

### Course Overview:

Risk Management in the Supply Risk is inherent in all supply chains, upstream and downstream. But with analysis, preparation and action, risk at every stage can be avoided, managed or deflected. The key focus of this course is “Making Your Supply Chain Risk-Resistant.” Risks can be categorized as Brand or Reputation Risks, Business Continuity Risks, Financial Risks, Operational Risks, Legal Risks and Technical Risks.

### Course Objectives:

- Develop, implement and manage a risk profile and strategies in accordance with existing contracts, applicable laws, regulations and organizational policy.
- Develop and implement a risk management and/or claims management program (for example, copyright violation, patent infringement, harassment).
- Implement supply management processes in consideration of legal issues.
- Develop/implement/maintain a database/physical filing system of relevant information.
- Verify the existence, accuracy and completeness of relevant financial transactions and commitments to third parties.
- Assess risk from end of life cycle issues in the market place and establish proper risk mitigation contingency plans for all components in the product.
- Manage and control the storage/disposal of hazardous/regulated materials and related documentation.
- Comply with programs that prevent and respond to discrimination or harassment.

### Methodology :

The sessions will be workshop styled and feedback, questions and assessments will be used to gauge progress and ensure understanding. Participants will be challenged to explore the concepts in detail and consider how they relate to their own supply chain environments.

The training programmes are designed to provide participants with an active and relevant learning experience. The resources and methodologies include a blend of lecture, interactive groups and discussions, webinars etc.

The training programs are very interactive. They are case studies based along with Q&A at the end of each session. This challenges the participants to use disciplinary knowledge & team participation skills.
